

John Jhigger Nepomuceno

Web Developer

Highly motivated and self-taught programmer with a passion for web development seeking opportunities to gain practical experience and contribute to projects as a web developer. Dedicated to delivering high-quality and customized web solutions that exceed expectations. Eager to apply my knowledge and skills in HTML, CSS, JavaScript, and other web technologies to create innovative and user-friendly websites.

WORK EXPERIENCE

Web Developer Freelance

07/2020 - Present

Achievements/Tasks

- Collaborated with clients to understand their project requirements and translate them into functional websites.
- Developed responsive and visually appealing websites using various web technologies.
- Utilized front-end frameworks to enhance website design and functionality.
- Conducted rigorous testing and debugging to ensure optimal performance and cross-browser compatibility.
- Integrated third-party APIs to incorporate desired features and functionalities.
- Demonstrated strong communication skills by actively engaging with clients to provide updates and address their concerns.

EDUCATION

Senior High School University of the Cordilleras

2016 - 2018

Governor Pack Road, Baguio City
2600, PH

Courses

- ICT

SKILLS

HTML5

CSS3

JavaScript

ReactJS

NodeJS

TypeScript

NextJS

TailwindCSS

MySQL

SELECTED PROJECTS

Pizza Stack [🔗](#)

- Designed an attractive and user-friendly interface using ReactJS and Chakra UI, added animations using Framer Motion, integrated a reservation form for franchising using Formik, and optimized the website for mobile devices.

Duckett Architecture [🔗](#)

- Developed a landing page for an architectural firm based in New Zealand to showcase their projects. I utilized NextJS, ReactJS and TailwindCSS to easily design and make it SEO friendly.

Qtopia [🔗](#)

- Created a landing page for an NFT project
